

TEE GROUP FILMS' SUSTAINABILITY BUYBACK PROGRAM

Tee Group Films' Sustainability Buyback Program has saved millions of pounds of plastic from entering the landfill.

The amount saved is equal to:

-  The weight of more than 95,000 standard sized car batteries
-  Enough energy saved to power a 50 watt light bulb for more than 12,500 years
-  Nearly 2½ cubic miles of material or a cube nearly twice the height of the world's tallest building

Tee Group Films' Sustainability Buyback Program
saves our customers money:

-  10,000,000 pounds of film have been recycled, resulting in more than \$1,000,000 saved by our customers
-  Our customers have realized additional savings of up to 12% through the Sustainability Buyback Program

Tee Group Films also recycles the plastic cores and pallets our film is shipped on when customers return the empty pallets and plastic cores for reuse.
